Original Diskettes:

Before you begin playing Dune II, you should make back-up copies of your master program diskettes to increase the life of the masters and guard against accidents. It is advisable to make back-up copies of your original disks because of the in-game file writing that must occur. Use the Amiga DOS DiskCopy command to make these copies. Once you have done this, install the game to your hard drive (see instructions below) or play the game from your copies. Refer to your computer manual for information on how to use the Amiga DOS commands.

Installation: Use any of the following methods to install Dune II.

Note: Dune II Amiga can only be run from hard drive on an Amiga with 1.5 Meg of RAM or above.

Workbench Installation #1: Make a directory in which you wish to install the game. Insert Disk 1 into any floppy drive. Double-click on the Disk 1 icon. Double-click on the 'Install' icon. In the Install window, type in the name of the directory (including its path) at the prompt.

For example: Work:Games/Dune2

Follow the prompts to complete the installation procedure.

Workbench Installation #2: Make a directory in which you wish to install the game. Insert Disk 1 into any floppy drive. Double-click on the Disk 1 icon. Single-click on the directory icon and hold the shift key down and double-click on the 'Install' icon. When the Install window opens, the name of the selected directory will be automatically filled in for you at the prompt. Press the RETURN key and follow the prompts.

CLI/Shell Installation: Make a directory in which you wish to install the game. Insert Disk 1 into any floppy drive. Change directory (CD) to the drive where you inserted Disk 1. From the shell prompt, type the following command line:

install <path + directory name to install to>

For example: install Work:Games/Dune2

Follow the prompts to complete the installation procedure.

Note: The text between the <> characters summarizes what information is required and is not meant to be taken literally. Typing 'Install' without a destination path will print out information on how to use the install program.

Playing the Game:

Floppy disk - Insert Disk 1 into your internal disk drive (DFO:) at the 'Insert Workbench' prompt.

If this is your first game select option 1 to make a saved game, otherwise select option 2 to play.

Hard Drive - Open the Dune II window by double clicking on the directory icon. Double click on the Dune II icon.
